Corrosive Liquid n.o.s., Packing Group (PG) II

5) As you read the linear information from left to right, you will find all the information in sections that you will require to properly package, label, and prepare your shipment. Any one of those sections which is highlighted in red text can be ‘clicked on’ for the information behind it.

*****Example*****

Click on the red [202](#) (which is essentially 173.202 packaging instruction) for that specific item. These are the instructions for ‘non bulk’ packages which are considered drums and smaller shipments.

For any exceptions that might be available for the item, click on the red [154](#) (which is essentially 173.154 packaging instruction) for that same item. As you can see, you have a Limited Quantity Exception that you can utilize under specific conditions.
